CS Study Away Guidelines and Information

- **You may receive credit for no more than 2 CS courses (elective or core) and 1 Math course**
- You cannot receive credit for the same course twice (i.e., If you take CS 374 abroad, you cannot take it at Williams.)
- You will receive four colloquium credits for each semester away, up to a total of eight credits.
- **You must get approval for courses you plan to take abroad for credit before taking them**
- To get approval, email the Dept Study Away advisor with a syllabus and course description for each course

- Study Away credit for CS courses is possible at most English speaking programs
- Credit may be obtained for non-English programs on a case-by-case basis
- Common programs: AIT Budapest, WEPO
- Common core courses taken abroad: Theory of Computation, Algorithms, Programming Languages
- Students generally find courses taken abroad to be less rigorous than our courses
- Beware of prerequisites and assumed prior knowledge (particularly for systems-oriented electives)
- Upon returning to Williams, submit Study Away Evaluation form to receive course credit
- All of this should be done in addition to the official protocol specified by the Study Away office.

Notes:
